Claim Rejections - 35 USC § 112

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1, lines 7-9, the limitation “by using content data and a distribution apparatus for a ride contents administration center” is very indefinite because the relationship between the content data and the distribution apparatus is not defined at all; lines 10-14 are very confusing because there is no specific structural features of the distribution apparatus and the simulation ride control apparatus recited, only their functions are recited. Therefore, it was not clear what are the metes and bounds of those apparatus.

Claim 3, “said distribution apparatus for the ride contents administration center has a function of deleting encrypted and distributed content data” is indefinite for the reason as set forth in claim 1.

Claim 4, “the encrypted and distributed content data” lacks antecedent basis; and the claim is indefinite for the same reason as set forth in claim 1.

Claims 6-8, 10-12, 14, 16-23 are indefinite for the same reason as set forth in claim 1.

Art Unit: 3711

Claim 24, lines 11-14 are indefinite because there is no specific feature of the computer software is being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by DiNunzio et al U.S. Patent 6,007,338 or Francis et al U.S. Patent 6,113,500.

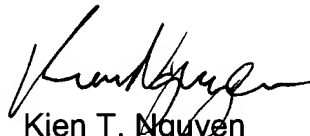

Both references disclosed a ride simulation having a seat rocking unit, a video unit, an acoustic unit, and a simulation ride control apparatus. Since there are no specific features of the distribution apparatus, simulation ride control apparatus and computer software are being recited; it is submitted that both apparatus are capable of perform such functions.
